PRINTED AND PUBLISHED BY WALKER, MAY & CO.

9 MACKILLOP STREET (OFF 56 BOURKE-STREET WEST).

MDCCLXXVII.

"The best laid schemes o' mice and men
Gang aft a-gley;
And leave us nought but grief and pain
For promised joy."

The above lines often are painfully and with regret spoken by those who having worked hard, and saved a sufficiency for retirement, to ease—and the natural comfort and contentment of a hard fought life, find that they are now suffering from ill-health, and with all the pains and penalties arising from their early indiscretions, and from disease uncured in their youth, and uneradicated. Let the seeds of disease once commence, the latter marches on with fearful untiring strides and in place of having

An old age serene and bright,
And lovely as a Lapland night,
Shall lead thee to thy grave.

(which)

you will get

"A hungry lean-fac'd villain, a mere anatomy,
A needy shallow-eyed sharp-looking wretch,
A living dead man."

I am led to these reflections because of the thousands who consult me, both by letter and personally, who inform me daily, nay, hourly, that had they but been warned of the dangers of excesses in their youth, they would not now be the fearful wrecks they present themselves.

How many thousands of young persons consult me, who find from their earlier indiscretions, when they are about to enter the holy bonds of matrimony, that the blessings of married life are denied them.

I (DR. L. L. SMITH, of Collins Street, Melbourne), emphatically and with the greatest truth can aver that there are few men who should enter the married state without previously consulting me.

DR. L. L. SMITH,

182 COLLINS STREET EAST,

MELBOURNE.

PROTECTED BY ROYAL LETTERS PATENT.
JAMES HAY AND CO.,
 PATENTEES & MAKERS OF THE PRIZE CIRCULAR FRAME PATENT GRUBBER
 Which Combines LIGHTNESS and COMPACTNESS with STABILITY and FREEDOM
 FROM CHOKING on the ROUGHEST SOIL.

This GRUBBER is on an entirely new and novel principle; has a Circular Frame, with three peculiarly twisted steel coulters turned all to the one side, which is intended to take the place of a Plough on clean land. The Grubber can be adjusted to the nature of the ground, and can be made to expand from 18 inches to 38 inches, and is thus capable of thoroughly lowering the land. A connecting rod, wrought by a pivot, affects the tines, so that at whatever width they are wrought they are always on the same angle as the beam.

At the ROYAL NORTHERN AGRICULTURAL SOCIETY'S TRIAL SHOW, in competition with the best makers, including the Messrs. Pirie and Sellar, this implement was awarded the FIRST PRIZE. It is now greatly improved, with bars for thoroughly turning up the weeds, pulverizing stiff land, keeping a clean furrow and adjustable wheels. All these improvements combined make it at once the lightest, strongest, cheapest, and most useful Grubber in the market.

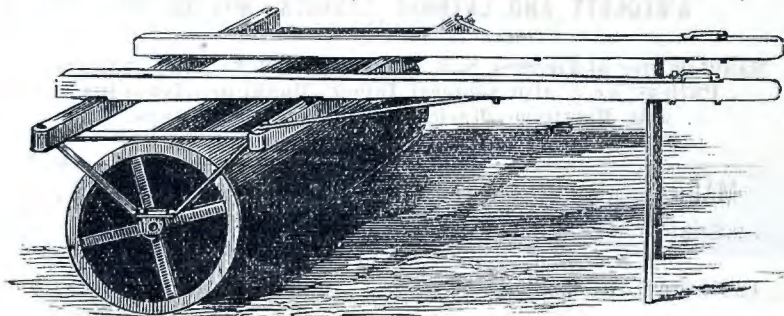

JAMES HAY & CO., (through their Mr. James Hay) having had more experience in making Prize Ploughs than any other man in the colony, farmers can depend upon all Agricultural Implements being made of first-class material and the best workmanship.

KIRK'S BAZAAR, MELBOURNE
LACEPEDE ISLAND GUANO,
ON VIEW AND ENTERED FOR COMPETITION.

This splendid Manure, though only lately introduced into the Australian Colonies, is fast supplanting all other Guanos.

According to an analysis made by Professor Kirkland, of the Melbourne University, it contains nearly 77½ per cent. of Phosphates, and about 2 per cent. of Ammonia; while it is almost entirely free from sand—only 0.90 being found.

Farmers and others who have tested this Guano, have proved its efficacy as a fertilizer, and predict an enormous demand during next season.

Supplied by the Undersigned at £6 per ton, net cash (bags in).

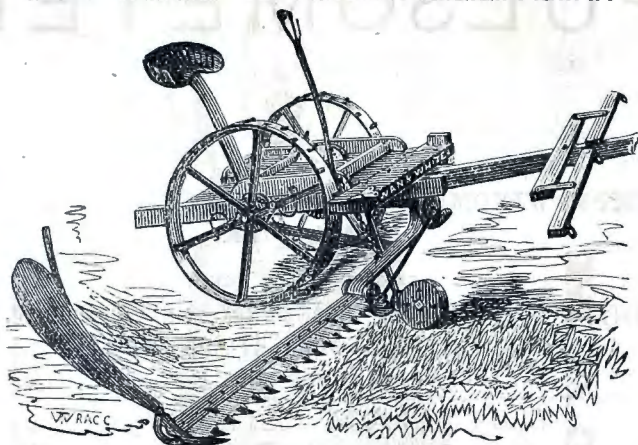

J. C. POOLE & CO., 108 Collins Street West, Melbourne.

Engineers, Founders, Boiler Makers, & Blacksmiths,

Manufacture Steam-Engines and Boilers, Flour Mills, Bark Mills, Sugar Mills, Quartz Crushers, Pumps, Saw-Mill Machinery, Screw Wool Presses, Rack Wool Presses, Hydraulic Wool Presses, Waterbills, Scoops, Boring Rods, &c.

Special notice is called to their Hydraulic Dumping Press specially designed for Station use, made to insure the proper pressure on Bale, reducing it to the proper size for shipment, also facilitating and cheapening inland carriage by having the Bales reduced to half the usual size.

These Hydraulics and the usual Wool Presses, efficiently arranged to work by Horse Power, either separately or conjointly, thus saving considerably in the expenses of the Wool Shed.

WOLTER AND ECHBERG'S Patent Celebrated WASHING MACHINE

IS THE

Best, Simplest, and most

EFFECTIVE MACHINE

ever invented for Washing Purposes.

It does the work equal to the best hand-washing; free from counter-friction, and does not chafe or tear the articles; only the weight of the clothes rub against each other and the inside of the Machine. The compressed air acts as the main agent in the cleansing process, being forced through the articles by the Machine, when in motion.

It will wash the heaviest Quilts or Blankets, as well as the finest Lace or Muslin; is an immense saving of labour; cannot get out of order, and will do the work in a fourth of the time occupied by other Machines.

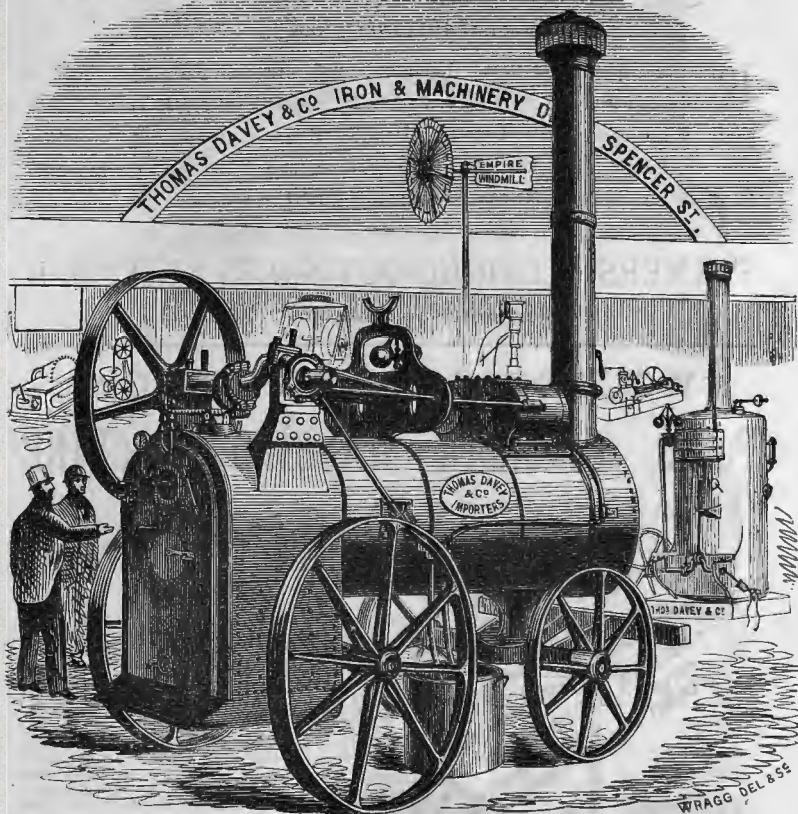

It was shown in operation daily at the SYDNEY EXHIBITION IN 1876, where a Special Prize was awarded; also at the MELBOURNE EXHIBITION, where thousands of people had an opportunity of judging of its merits.

To be had of all the principal Iron-mongers, and at the Factory, 6 Russell-street, Melbourne.
