PATENT "STOVER" WINDMILLS,

SIMPLE,
DURABLE,
CHEAP,
And Perfectly Self-Regulating.

The "STOVER" WINDMILL is used principally to pump water for railroads, private residences, farms, hotels, breweries, &c., in places which do not enjoy the advantages of a continuous water supply, and it is also largely made use of for irrigation purposes.

The turn-table of this Mill is of chilled iron; on this rest chilled balls, the main casting of the Mill resting on the balls. These balls are entirely covered from rain and storm. The connection is made with ball and socket joint, which makes a swivel, ENABLING THE MILL TO CHANGE AS THE WIND CHANGES, at the same time making a strong joint to draw on. The wheel is a solid rosette, the vane or rudder being hinged. Its motion or speed is governed by a graduating weight, which works exactly like the governors of a steam engine, an increased pressure of the wind folding the wheel in line with the vane, which raises the governor, and as the wind diminishes the weight of the governor brings the wheel back into the wind.

For HOTELS or PRIVATE RESIDENCES this Mill possesses the great advantage of RUNNING WITHOUT NOISE, while the comparatively insignificant cost of keeping it in working order renders it a valuable substitute for the expensive system of pumping by hand labour.

JOSEPH NICHOLSON & CO.'S

PATENT SPUR-GEARING STRIPPERS.

Winners of First Gold Medal—Melbourne International Exhibition, FIELD TRIAL, 1881, and have defeated all Competitors at recent FIELD TRIALS of any note.

PRICE, £60; EXTRA LARGE, £65.

The advantage of the Patent Spur-gearing is an immense saving in draught—equal to one horse in each machine. The action of the spur wheels is direct and simple, enabling the stripper to work with a steady regularity which cannot be obtained by the use of a belt. Experience has proved their strength and durability, hundreds being now in use with most satisfactory results. By this method of gearing, or substituting two spur wheels for the large pulley and belt, the speed can be adjusted to suit the weather or the district. The mode of effecting any change is simple, easy, and readily performed.

Manufacturers of Reapers, Mowers, Improved Horse Powers, Winnowers, and Ploughs, &c. Full information and Catalogues by post.

Address—BOUVERIE AND LEICESTER STREETS, MELBOURNE.

PRICE, £25; if Mounted on Wheels, £2 10s. extra.

A Superior Corn Dresser, with Plenty of Riddle Room.

NICHOLSON'S PATENT BACK DELIVERY REAPER.

PRICE - - £30.

THIS Reaper, since its introduction, has commanded a very large sale, and in every instance has given the purchaser the greatest satisfaction. It is very strong in construction, and the engraving shows its simplicity. Every point has been studied so as to adapt the Machine to the wants of our Agriculturists. Wrought-iron has been used wherever it could be introduced. The castings, which are fewer in this machine than in any other, are all extra strong; should an accident occur, any part can be replaced on the receipt of a letter or telegram. A special advantage this Machine has is that there are only two bolts required in its construction, which does away with the necessity which exists in other makers' machines of constantly screwing up the numerous bolts, which are always working slack. It is also fitted with a side lever for regulating the cutting height and striking out gear, which is so placed that the driver has perfect control.

Gold Medal, Melbourne International Exhibition, 1881.

And FIRST PRIZES at almost every Field Trial & Agricultural Show wherever exhibited.

JOSEPH NICHOLSON & CO.'S IMPROVED WINNOWING & CORN-DRESSING MACHINE.

Fitted with Bagging Elevators, and Mounted on Wheels.
Price £26 10s., Complete.

THESE WINNERS have given universal satisfaction, from the rapidity with which they clean grain, and the ease with which a good marketable sample is produced.

The above engraving, showing the Winnower and Corn Elevators, with undercarriage and wheels for easy transport, is one of the most useful and handy machines on the farmstead. It is fitted with spike-roller for cleaning after stripping, saves the labour of one man in shovelling or filling the grain into sacks, and prevents it being wasted by being trodden upon or scattered upon the floor.

DOUBLE AND TREBLE FURROW PLOUGHS.

JOSEPH NICHOLSON & CO.

J. NICHOLSON & CO'S

Price, £27 10s., fitted with Steel-plated Fingers; and £26 with Plain Fingers.

At the Great Field Test of Mowers held in connection with the Sydney Intercolonial Exhibition, Nicholson's Australian Mower was awarded *First Prize*, after Trial, for superiority of construction and practical working in the field, the draught, as shown by dynamometer, being 242lb. in a heavy crop of lucerne, while the best English and other Colonial Mowing Machines registered 396lb. and upwards; and at the National Field Trial for Mowers, held at Moonee Ponds, near Melbourne, on the 24th November, 1874, it not only was awarded the *First Prize*, but the *Second Prize* also, competing against Colonial, American, and English Machines.

For Portability, Light Draught, Close Cutting, Simplicity of Construction, Easy Management in the Field, and Moderate Price, this Machine stands *unrivalled* as a Mower of any description of Crop, and has been awarded the *First Prize* in most Field Trials held in Victoria or the neighbouring Colonies.

PRICE, £18, including Two Poles.

THESE Machines are constructed entirely of Iron, are simple in construction, and very strong. The pole or poles ("as it can be used either as a Single or Double Horse Power") are fixed in such a manner that the pull is direct, the strain thus being reduced to a minimum. The speed is sufficient without the expense of an Intermediate Motion.

They are acknowledged to be the most simple, serviceable, compact, and durable horse-works yet introduced to the Public.
