Competition is restricted to cows exhibited in the "In Milk" Classes, and must be milked for the production of dairy produce. Any cows rearing calves are ineligible to compete for this award.

# When the bands come marching in, it'll be with a little help from us.

Our founder, James Hardie, was a Scotsman; so it's perhaps not surprising that our involvement in this year's Royal Show has a definite Scottish flavour. It is with great pleasure that the James Hardie Group is sponsoring the performances of 18 Highland Bands from all over Australia. They will be playing a wide range of music that includes traditional Scottish airs and even some Jazz.

The James Hardie Group helps the Highland Bands play the pipes for you on the 20th and 27th at 8.00 pm.

# We help to build the Australian way of life.

Ideas shape the future. Ideas spark research leading to new products and better processes. To an improved standard of living and increased life expectancy.

Every day, without knowing it, you're enjoying the benefits of ICI Australia's ideas.

The food you eat is protected by ICI products that help keep crops and animals healthy.

The clothes you wear contain modern fibres produced by ICI technology.

ICI produces the raw materials for a host of everyday items:

- From brake fluids to non-stick frying pans.
- From plastic lunch-wraps to washing-up liquids.
- From antiseptics to life-preserving heart drugs.

The products of our petrochemical industry play a big part in the life of every Australian.

Every year, ICI Australia spends nearly \$20 million on research, development and technical services aimed at making a better future for all Australians. And the hundreds of millions we are spending on new plants will provide more jobs, and more products, for that future.

ICI is people, products and progress. And we're planning on making a big contribution to the Australian way of life for many, many years to come.

## TO IMPROVE NATURE YOU DON'T ALWAYS HAVE TO CHANGE IT.

While a lot of landscaping makes a garden more functional, it can destroy the natural look.

A problem you won't strike when you use Koppers Logs.

These round pine logs blend naturally with the landscape creating unobtrusive garden boxes, seats, retaining walls and terracing.

The logs are impregnated with 'Tanalith' so they are both rot and white

ant resistant, and will last a lifetime.

And better still, they are light and easy to handle, and priced very competitively.

Koppers Logs. Improving the landscape without detracting from the natural look.

# PICK UP A NIKON

## for around \$300

The Nikon EM is totally new in concept, design and engineering.

The challenge to the Nikon craftsmen was an ultra compact, aperture priority, automatic 35mm SLR camera, at a price that would bring Nikon quality to everyone. What they did not do was to water down any existing or previous Nikon camera. The challenge of a totally new camera has been met: The Nikon EM.

**This is what makes the EM a sensation:**

**Listen to your Nikon**

Space-age electronic circuitry "beeps" if you're not in "best exposure" range. Shutter speed is

automatically chosen: simply move the aperture setting until the EM stops "beeping". All exposure information appears in the big brilliant viewfinder and there is manual override at 1/90th of a second.

**The Nikon features you expect**  
"Battery miser" control of electronic circuitry - power is switched on and off automatically; backlight button to control dramatic exposures; black body; battery check button; ultra fast film advance lever; self timer; rugged all metal vertical focal plan shutter; film memo holder and more — much more.

**New 'Series E' lenses**

For a new concept in camera, naturally a new concept in lenses.

The accent is on light weight and economy. Nikon has produced three: 35mm f2.5 wide angle, 50mm f1.8 standard and 100mm f2.8 telephoto. Of course the EM also accepts dozens of the matchless Ai-Nikkor lenses.

**Accessories you can add later**

A special flash unit - the SBE - automatically sets speed, and LED shows if the aperture is not correct. More: the Nikon MD-E motor drive is amazingly light, simple to attach and shoots at two frames per second.

**Nikon EM: you automatically join the Nikon system.**

The eartag or tattoo numbers of rams and ram lambs tested and examined must be included in the certificate.

Owners should particularly note:—

- (1) That blood sampling should be carried out early in the prescribed period to avoid congestion and delay in the testing laboratory at the end of the period.

If exhibitors produce evidence that their flocks have been accredited free of Ovine Brucellosis a veterinary certificate will not be required.

**INTERSTATE EXHIBITORS** must conform with the **Stock Diseases Regulations 1970** which require that rams for breeding must be accompanied by a Third Schedule to the above Regulations.

This includes a declaration by a Government Veterinary Officer to the effect that the rams

- (a) have been manually examined and found to

be free of clinical evidence of epididymitis, and

- (b) originate from an accredited ovine brucellosis free flock or each animal in the consignment has been subjected to a blood test for ovine brucellosis with negative results within the period of 30 DAYS immediately preceding the date the certificate is issued.

# PICK UP A NIKON

## for around \$300

The Nikon EM is totally new in concept, design and engineering. The challenge to the Nikon craftsmen was an ultra compact, aperture priority, automatic 35mm SLR camera, at a price that would bring Nikon quality to everyone. What they did not do was to water down any existing or previous Nikon camera. The challenge of a totally new camera has been met: The Nikon EM.

***This is what makes the EM a sensation:***

**Listen to your Nikon**  
Space-age electronic circuitry "beeps" if you're not in "best exposure" range. Shutter speed is

automatically chosen: simply move the aperture setting until the EM stops "beeping". All exposure information appears in the big brilliant viewfinder and there is manual override at 1/90th of a second.

**The Nikon features you expect**  
"Battery miser" control of electronic circuitry - power is switched on and off automatically; backlight button to control dramatic exposures; black body; battery check button; ultra fast film advance lever; self timer; rugged all metal vertical focal plane shutter; film memo holder and more — much more.

**New 'Series E' lenses**

For a new concept in camera, naturally a new concept in lenses.

The accent is on light weight and economy. Nikon has produced three: 35mm f2.5 wide angle, 50mm f1.8 standard and 100mm f2.8 telephoto. Of course the EM also accepts dozens of the matchless Ai-Nikkor lenses.

**Accessories you can add later**  
A special flash unit - the SBE - automatically sets speed, and LED shows if the aperture is not correct. More: the Nikon MD-E motor drive is amazingly light, simple to attach and shoots at two frames per second.

**Nikon EM: you automatically join the Nikon system.**
