# FIFTY-NINTH ANNUAL REPORT

## OF THE

## COUNCIL

## OF THE

# ROYAL AGRICULTURAL SOCIETY

## OF VICTORIA

---

To the Members.

Ladies and Gentlemen,—

Your Council has pleasure in presenting the following report of proceedings of the Society for the year 1929.

### Permanent Buildings and Works.

Chief amongst the improvements carried out during the year was the erection of a two-storied sheep pavilion on the site of the old poultry house. This building, together with the pipe railing and metal mesh sheep pens, cost £10,088/3/8 to erect. It provided a long-felt want, because, for years past the space available for sheep exhibits was altogether too restricted.

To replace the one demolished by a wind storm during the 1928 Show, a fine large result board was erected at a cost of £1041/19/-. As this was constructed of steel, with concrete foundations, it should be practically everlasting.

The whole of the arena was reticulated with a water service and sprinklers installed throughout. Grass seed was sown and the whole area treated with fertilisers, with the result that it was in better order than at any previous Show. This work cost £392/4/9.

The public conveniences along the Lang's Road boundary were connected with the sewerage. This practically completes the work of this character that the Society has to undertake. Since the Show the pigeon house has been extended by thirty-four feet. Additional feed stalls were built beside the No. 2 Horse Pavilion (sleeping bunks were provided in many of the stalls); concrete floors were laid down in the lockers opposite the No. 3 Cattle Pavilion; two additional hospital pens were provided in the cattle section and electric light installed throughout the whole group; self-filling water troughs were fixed in the stalls used by test cows; a cool store was built in the kitchen under the main grandstand; and many other improvements of a minor character were undertaken during the year, the total expenditure amounting to £13,555/6/8.

Apart from the cost of painting a large number of buildings about the grounds, the heaviest item of expenditure in connection with the maintenance of the Society's property was that incurred through the surfacing of roads and paths with tar. Your Council considers that a high standard of maintenance of both roads and buildings is absolutely essential.

### The Exhibition.

The Society's Annual Exhibition was held from 19th to 28th September, 1929. The Prize Schedule was revised early in the year, and liberal prizes were again offered for competition.

An excellent entry was received, that for the ordinary competitive sections constituting a record; but there was a falling off in the number of entries for the arena contests when compared with the record figures of the previous year.

The space, both inside the exhibit halls, as well as about the grounds, was fully availed of. The weather conditions were generally favourable, but owing to the prevailing period of depression caused by unemployment and an adverse season from an agricultural and pastoral point of view, the aggregate attendances showed a reduction of 19,592 on last year's figures, which, in turn, were well below the record attendance of 318,457 established in 1925. The aggregate attendance at last Show was 254,664.

The gate money, including £1641/2/6 from the grandstands, amounted to £16,252/14/3, showing a falling off of £1455/6/10 on last year's takings, and a falling off of £6293/8/2 on the record takings in 1925.

For the purpose of comparison, the following table is published to show the number of entries in the several sections for the last two years:—

Although there was a falling off in entries, there was a splendid display of Clydesdales, the males being especially attractive. There are so few Shires in the country that it is doubtful if the retention of a section for this breed is warranted; no entries were received at the last Show.

It was pleasing to observe that, in numbers, the farm and lorry horses practically made up for the loss in entries occasioned by the deletion of the classes for unregistered draughts. Competition in these utility classes would undoubtedly be keener were it not for the high wages costs associated with the exhibition of lorries and horses during the period of the Show.

Competition in the sections for Arabs and Thoroughbreds is always very disappointing, there being so few of the former breed in the country, while, in the case of thoroughbreds, breeders place more reliance upon racing records than upon type and conformation, as exemplified by comparisons in a show ring.

Much better support and a higher standard of quality should be expected in the section for Trotters, for although mainly bred for speed, they should form the foundation of much of our utility light horse stock.

In the breeding sections for Hackneys, Cobs and Ponies, there is also much room for improvement, but some excellent animals were exhibited in the sections for saddle and harness horses and ponies.

There was a good entry of Shorthorns, and the general high standard of quality was favourably commented upon. The alteration in type from that which obtained a few years ago is conclusive evidence that the production of early maturing stock of prime quality is absolutely essential to meet the present market requirements.

Neither the Herefords nor the Polled Angus were strong in numbers, but in both sections some good stock was shown.

Red Polls made a magnificent display; not only was the quality high, but in numbers there was an 80 per cent. increase.

The Milking Shorthorn classes were well filled, and the exhibits were of uniformly high standard.

The inclusion of a section for Illawarra Milking Shorthorns was fully justified, and it appears likely that in the years to come this section will greatly increase in popularity, particularly now that the long-sought amalgamation of the Australian Milking Shorthorn and the Illawarra Milking Shorthorn Societies has at last been consummated.

Ayrshires were slightly fewer in numbers, though probably of improved quality, while Jerseys not only were in record numbers, but the exhibits attained a very high standard, this being particularly in evidence in the male classes.

Last year's figures were maintained in the Guernsey and Friesian sections. There were many fine exhibits of both breeds, and it is evident that both are gaining in popularity.

The Milk and Butter Fat Tests retain popular interest, and undoubtedly do much to focus attention upon the necessity of feeding scientifically and carefully testing, in order to secure the highest returns from dairy stock.

Some excellent exhibits of fat cattle were penned, but there was a fairly considerable falling off in entries.

The sheep, as a whole, constituted one of the most attractive features amongst the live stock sections. The exhibits were splendidly housed, ample accommodation being available in both the old sheep houses and in the new pavilion, which was just completed immediately prior to the opening of the Show.

The entries were not quite as numerous as in 1928, but competent judges expressed the opinion that as an exhibition of British Breeds of Sheep it had not previously been equalled in the Commonwealth.

Corriedales demonstrated a marked increase in popularity; not only did the exhibits show an increase of more than double that of last year, but a very high standard of quality was attained throughout the whole section.

There are evidences that Dorset Horns, too, are steadily gaining in popularity.

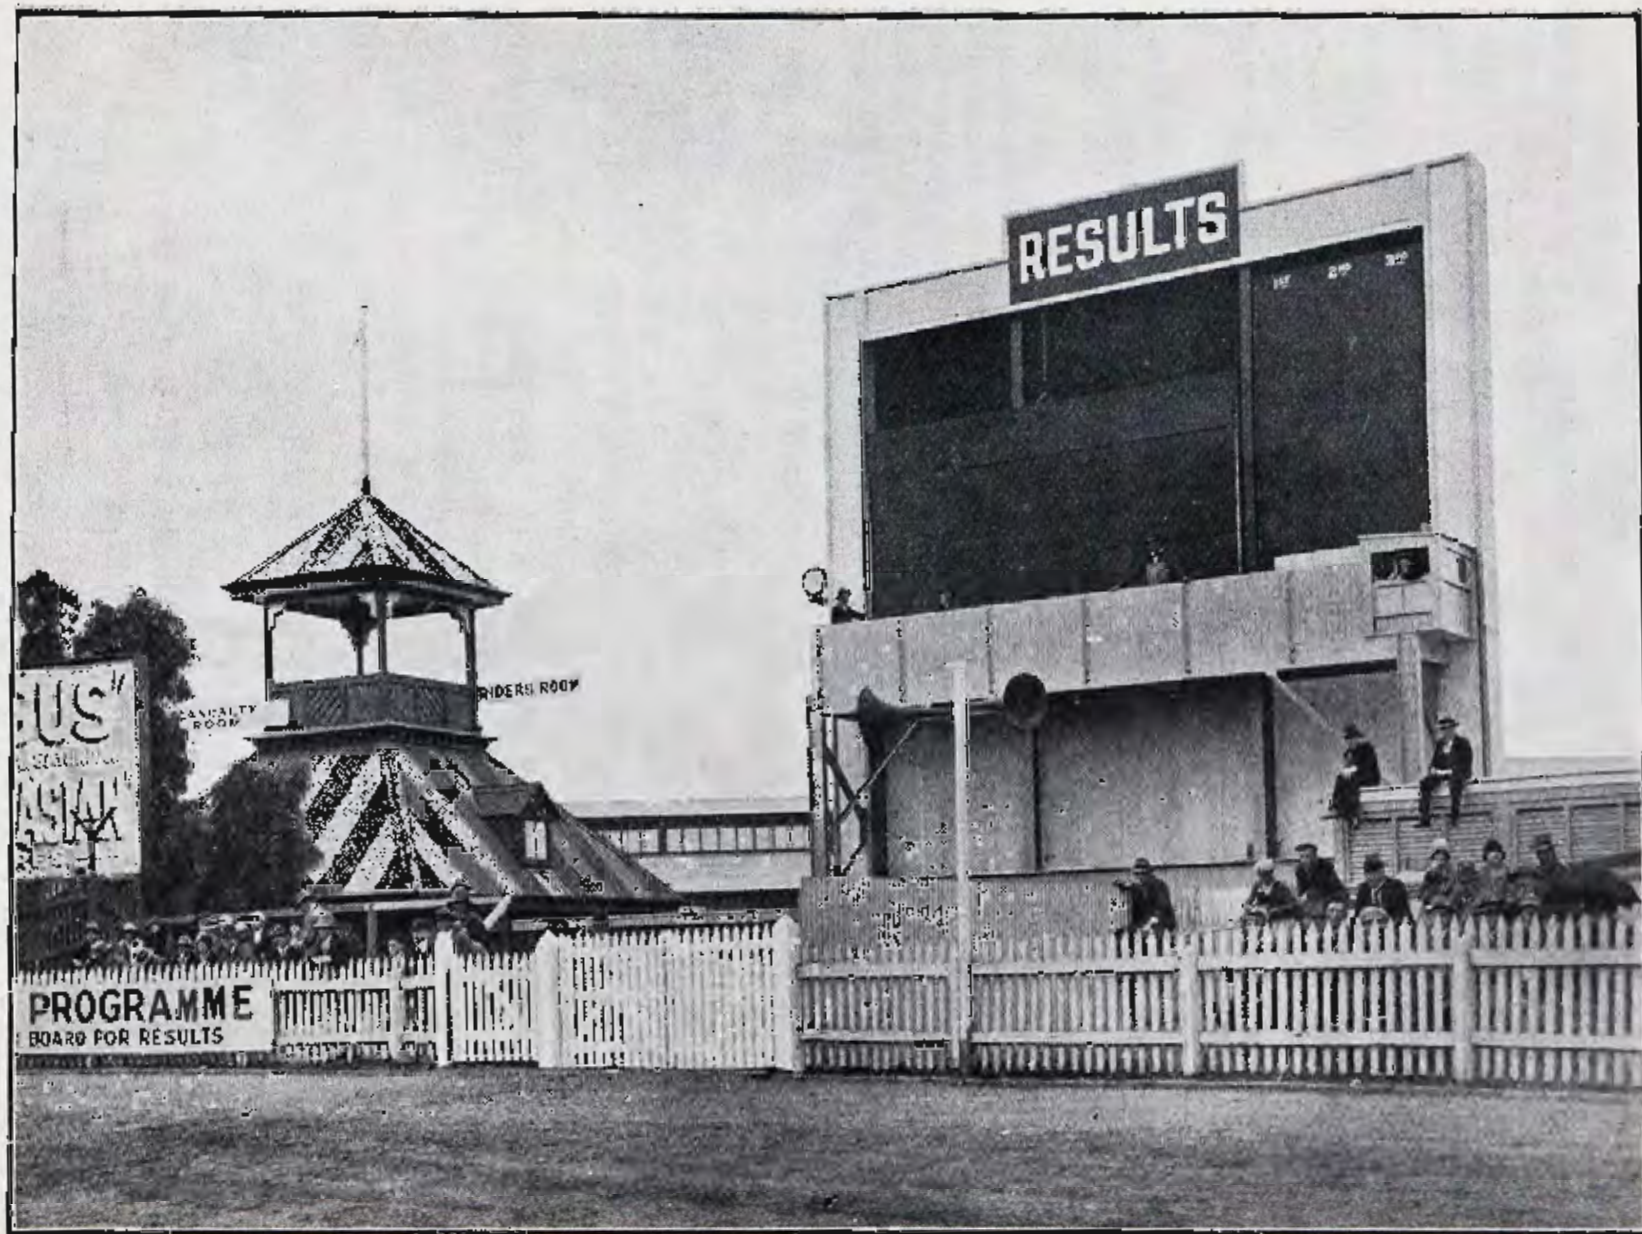

After a lapse of two years, swine exhibits made a reappearance at the grounds. There was a big entry, and a splendid display, which was fully representative of the seven pure breeds that are favoured in this State.

Excellent displays of high-class birds were made in both the poultry and the pigeon pavilions. In the latter instance the congestion caused by a steadily increasing entry is being dealt with by extending the building to increase its capacity by approximately twenty-five per cent.

A record entry of dogs, as a whole fully representative of their respective breeds, made an attractive exhibition during the first three and the last three days of the recent Show.

Cats, though in fair numbers, have not provided as attractive a section as was at first anticipated.

THE NEW RESULT BOARD.

In the Agricultural Hall there was much of public interest. The five displays by agricultural societies reached a standard never previously attained, both from the point of quality of products, as well as from an artistic standpoint. There was also a fine collection of exhibits from State School plots; a good display of farm and dairy produce; improved competition in the apiculture section; and a magnificent entry of wines, the quality of which was most satisfactory.

Owing to the unfavourable season, the exhibits of fruit fell off to about half of last year's record entry.

Women's work exhibits were in record numbers, and of a higher standard than formerly. The ten displays in the One Woman's Work class provided a most interesting feature.

The arena contests were well filled, and diversified programmes were provided throughout the whole period of the Show.

There was a large increase in entries in the Milking and Judging Competitions. It is evident that the educational value of these contests is now becoming more fully appreciated.

In the Government Pavilion the Department of Agriculture again provided a most educational exhibition. The Forestry Department and the State Rivers and Water Supply Commission made displays that were keenly appreciated by the public.

The displays of moving machinery again constituted an outstanding feature of the Show. Motor cars and trucks were shown under splendid conditions. The Industrial Stands were as attractive and popular as ever, and the games and side shows made the usual appeal to Show visitors.

Passenger traffic was particularly well conducted by the Railway Department and the Tramway Board, while the transport of live stock, except in a few isolated cases, was conducted in a most satisfactory manner.

Cheap excursions from country districts were arranged by the Railway Department this year, and although these concessions were not availed of to as large an extent as anticipated, it is believed that in the future these excursions will steadily increase in popularity.

The Creche was splendidly conducted, and well patronised.

The catering was well carried out in the Luncheon and Refreshment Rooms, but the necessity of making several improvements in two of the kiosks has been noted for attention before next Show.

The Exhibitors' Club did not receive the same measure of patronage as last year, but a further trial will be made before its discontinuance will be considered.

An outstanding feature of the grounds this year was the excellence of the garden plots. The roads, the lawns, and the arena too were all in excellent order.

### **The Australian Society of Breeders of British Sheep.**

This Society continues to show excellent progress.

Since it was established in 1925 to take over the control of the "Flock Book for British Breeds of Sheep in Australia," the number of registered flocks has more than doubled. A volume of the book is published each year, and the 21st edition issued in May last contained the histories and particulars of 770 pure flocks, in addition to the pedigrees of 1024 individual sheep.

At the annual meeting of members of the Society, held during the currency of the Show, it was decided to alter the constitution to permit of the registration of pure flocks that were previously debarred. This alteration will, no doubt, be the means of considerably increasing the number of registered flocks in Australia.

Branches of the Society are in active operation in Tasmania, Western Australia, South Australia and Victoria, and it is anticipated that shortly a Branch will be established in New South Wales.

In addition to the compilation and publication of the Flock Book, the Society, through its Branches, is of considerable assistance to agricultural societies in the matter of recommending judges, supplementing prize lists, and so forth.

Special prizes, totalling £64/10/-, were donated by the Victorian Branch at the last Melbourne Royal Show, and this support is much appreciated by your Council.

Both the South Australian and Victorian Branches conduct annual sales of registered sheep on behalf of their members, and in this connection it might be of interest to mention that, in November, 3500 flock sheep belonging to Victorian breeders were disposed of at the Newmarket yards at satisfactory prices considering the adverse season experienced in the Northern districts of the State.

### **The Commonwealth Clydesdale Horse Society.**

Much good work has been done by this Society through the medium of the "Horse News," which it has issued each month, and the high-class "Annual," which it published in August last. The evidence of the economy of horse usage, both on farms and in the cities, which has thus been widely distributed, has had a stimulating effect, not only on the number, but on the quality of the Clydesdale stock throughout Australia, and on the membership of the Society. Some of the best young animals in Scotland have been imported to South Australia during the year, and the prices paid for animals offered at the dispersal sales of well-known Clydesdale studs in Victoria show a keen interest in the breed; whilst numerous and very satisfactory sales of horses for farm work, more especially in Western Australia, in which State there is also a scheme of Government subsidised purchase of stud stock, have been very encouraging to breeders.

This renewed interest was responsible for the splendid exhibit of Clydesdales at our 1928 Show, at the Sydney Royal Show last Easter, and again at our recent Show, when keen competition between high quality animals was the order of the day, and several strong groups paraded for the District Competitions.

The fifth volume of the "Commonwealth Clydesdale Stud Book" is now being compiled, with a view to publication at an early date.

Members of this Society are hopeful that no action of the Federal Government will prevent the Development and Migration Commission from carrying out its proposed investigation into the Farm Power Problem, because they are confident that a thorough enquiry, such as this Commission may be relied on to make, will provide just that independent evidence of economy which will crown the Society's efforts to encourage the breeding and use of horses in the belief that, by this means, much of the £5,000,000 annually expended on tractors and their petrol and oil requirements could be retained in Australia.

### **The Ayrshire Cattle Herd Book Society of Australasia.**

With the formation of a Branch in Western Australia in October last, the organisation of this Society has been completed. There is now a properly constituted Branch in each of the six States, and the progress previously reported has been more than maintained during the past year.

This Society published the twentieth volume of its Herd Book in January, and its twenty-first volume in August last, whilst entries for its twenty-second volume, which has just been closed, will contain a greater number of pedigrees, thus demonstrating an increased popularity of this breed with Australian dairy farmers.

The Calf Register, introduced at the commencement of the year, has worked smoothly, and has resulted in the records of the Society being placed on a much more satisfactory basis, whilst the ever-increasing number of herds being submitted to official test is providing the evidence of productive ability, which is reflected in the keener demand for Ayrshires throughout the Commonwealth and the greatly strengthened Society which is fostering the interests of that particular dairy breed.

### **The Australasian Jersey Herd Society (Victorian Branch).**

New records were established by this Branch of the Society during the past year, not only in membership, but in the number of animals registered. Further records were also established by an increase of 50 per cent. in the number of Jerseys submitted to official test in this State and their splendid records of production, which resulted in representatives of this breed predominating in the various classes.

Active propaganda work has been carried on throughout the year, considerable expenditure having been incurred in advertising, the issue of booklets, and the distribution of well-illustrated calendars; whilst, to demonstrate its interest in the general testing of dairy herds, the Committee recently decided to offer, through the Victorian United Cow Test Association, three £5/5/- prizes for the best groups of animals, irrespective of breed, under Association test throughout the State.

The Federal Council of the Society has continued the publication of the Society's official journal, "The Jersey In Australia," and has, for the purpose of ensuring that all stud book animals are satisfactorily marked for identification, incurred the very formidable expense of having herds examined by official Inspectors appointed by the various Branches. The carrying out of this work has meant a delay in the publication of the sixteenth volume of the Society's Stud Book, but it is anticipated that the volume will be issued at an early date.

### **The Red Poll Cattle Breeders' Association of Australasia.**

The increased membership of this Association and the number of animals submitted for registration, coupled with the keen demand for Red Polls throughout the Commonwealth, is evidence of the marked advance the breed has made in public favour, and shows a very satisfactory result from the activities of the Committee in making widely known the dual-purpose characteristics of the Red Poll breed.

The fifth volume of the Association's Herd Book, which has just been published, contains as many pedigrees as the two previous volumes combined, representative of herds throughout Australia, many of which were not previously registered.

The new volume also contains a list of Judges and a revised Standard of Type and Character for Red Polls, made necessary by the greater interest that is being taken in the breed.

The Official Herd Test provides the means of demonstrating the dairy side of this dual-purpose breed, and, to provide facilities for advertising its capacity for the production of prime beef, the Association has continued to subsidise the very interesting Carcase Competitions for pure bred steers at our annual shows.

### **The Friesian Cattle Club of Australia.**

This Club has been further strengthened and developed by the recent formation of a properly-constituted Branch in Western Australia, in which State the Friesian breed is making good progress.

A HAPPY PICNIC PARTY AT THE SHOW.

The Victorian Branch membership is now in excess of that of all other Branches combined, and the number of animals submitted for registration in this State reflects the increased popularity of the breed occasioned by the sterling performances of Friesian females under official test.

The Federal Council of the Club published the ninth volume of its Herd Book early in the year, and is now about to issue its tenth volume, one of the features of which is the number of animals owned by breeders in Tasmania, where the breed has done remarkably well under test, and is, consequently, in greater demand.

### **The Shorthorn Society of Australia.**

Despite the adverse conditions obtaining with regard to the beef-raising industry, this Society continues to make very satisfactory progress.

The fifth volume of the "Shorthorn Herd Book of Australia" was published by the Federal Council of the Society in June last, and, in addition to being the largest, was certainly the most representative volume yet published, for, in addition to entries from all the Australian States, it included the pedigrees of a large number of animals from well-known studs in New Zealand.

The Victorian Branch, whilst maintaining its membership, has continued to subsidise Carcase Competitions for pure bred steers, and, in order to perpetuate the memory of that great breeder, the late Mr. Robert Clarke, who for so many years was a member of the Council of this Society, has invested on trust the sum of £200, the annual income from which is to be used exclusively for the purchase of a cup to be named "The Robert Clarke Memorial Cup" and be competed for annually at this Society's Show.

### **The Milking Shorthorn Cattle Breeders' Association of Victoria.**

With a very satisfactory credit balance at the bank and a much clearer field of operations resulting from the amalgamation under a new title of two other bodies which were somewhat similarly named, this Association hopes to more easily achieve the objects for which it was established, viz., to encourage the breeding of dual-purpose stock, which it believes to be essential in modern farming, and to conduct a Herd Book, in which each animal will be classified according to its authenticated pedigree, on lines similar to those adopted by the Association in Great Britain.

Having those objects in mind, studmasters are making arrangements for the importation of fresh blood from the Old Country, whilst breeders generally are submitting their cattle for classification, with a view to ultimate registration in the Association's Herd Book.

### **The Guernsey Cattle Society of Australasia (Victorian Branch).**

Following the reconstruction of the Society at a general meeting of members held in Sydney last Easter, a Federal Council was constituted of representatives of Branches tentatively formed in Queensland, New South Wales, Victoria, and Western Australia.

The formation of the Victorian Branch has been formally ratified by members, and much optimism prevails regarding the future of the Guernsey breed in this State. Breeders recognise that, owing to the stringent regulations governing registration in the Society's Herd Book and the shortage of females, progress must of necessity be slow at first, but that it is

certain is clearly shown by the purchases already effected in Australia and the arrangements made by various members for the importation to this State of several animals of both sexes direct from the home of the breed.

The success of this Branch is already assured by the enthusiasm of the members of the strong Committee appointed and also by the productive ability of Guernsey females, which, during the past year, has been clearly demonstrated through the medium of the Official Herd Testing Scheme.

### **The Australian Stud Pig Breeders' Society.**

The return to normal conditions in the pig breeding industry, as a result of the lifting of restrictions made necessary by the disastrous outbreaks of swine fever in several States, has been followed by a phenomenal increase in the demand for stud pigs throughout Australia, and has been reflected in the membership of the Society and the number of pigs registered in the twentieth volume of its Herd Book, which has just been published.

The Victorian Branch is in a flourishing state, and breeders generally were delighted that it was possible to exhibit pigs at the last Show, after a lapse of two years. This Branch not only subsidised the very successful Carcase Competitions for bacon and pork pigs and best cured carcase at the Royal Show, but arranged to subsidise classes for bacon pigs at ten country shows throughout the State.

Through its representative on the Pig Industry Committee, the Branch is taking an active interest in the improvement of conditions in the industry, the conduct of experiments in breeding and feeding, and the prevention of losses at present caused by the mortality amongst young pigs.

### **The Victorian Working Sheep Dog Association.**

Good progress has been made by this Association during the year, and, as a result of its activities, much greater interest is being taken in the breeding and training of sheep dogs. The membership has been increased and a considerable number of additional registrations effected, whilst the funds of the Association have also benefited from the proceeds of trials, in the conduct of which it has co-operated with other bodies. The Association aims at securing uniformity as to the method of conducting trials, the reception of entries therefor, and the control of both men and dogs competing thereat, in the best interests of all concerned, and, as a result of a cordial invitation recently issued, several additional Agricultural Societies have resolved to affiliate and co-operate with the Association with this end in view.

### **The Australian Illawarra Shorthorn Society.**

In pursuance of its policy to co-operate in the development of all properly constituted stud stock breeders' associations, your Council, at its April meeting, agreed to take over the secretarial work of a Victorian Branch of the Australian Milking Shorthorn Cattle Association. Since then, that Association has amalgamated with the Illawarra Milking Shorthorn Society of Australia, under the title of "The Australian Illawarra Shorthorn Society." The indications are that this new body, which commenced to function at the beginning of the present year, will be one of the strongest and best organised bodies of cattle breeders in Australia.

### **The Victorian United Cow Testing Association.**

At its December meeting your Council agreed to take over the secretarial work of the Victorian United Cow Testing Association, thus further marking its desire to encourage the testing of all dairy herds, it having already demonstrated its interest therein by a decision, at an earlier meeting, to issue a suitable illuminated certificate to each dairy farmer who had under Association test developed a herd which averaged 300 lbs. of butter fat or over in any year since such testing was inaugurated.

### **Victorian Poultry Control Council.**

At a conference of representatives of the Chamber of Agriculture, Victorian Poultry Controlling Associations and this Society, held in January, 1929, it was decided to form one Council for the sole control of poultry exhibitions in Victoria. Representatives of the bodies above-mentioned constitute the Council, and the secretarial work is being performed by this Society's staff.

The Council has made rapid progress, and although it has only been in existence for nine months, over 500 poultry exhibitors and 40 poultry showing bodies, including 27 agricultural societies, have become affiliated.

The Council recently issued a panel of competent poultry judges for the assistance of its affiliated Clubs, and is now engaged upon preparing a complete book of judging standards of the various breeds.

### **The Canine Control Council.**

That this body is now acknowledged to be satisfactorily controlling the great majority of canine clubs in Victoria, is borne out by the fact that during the year affiliation was secured with the Kennel Club of England. The efforts of this Council have resulted in harmonious relations being enjoyed by the Council's 200 odd members and the supporters of its 19 affiliated bodies.

Examples of the satisfactory results obtained were seen at both Royal Shows held under C.C.C. rules, the canine section of the 1929 exhibition easily surpassing that of 1928, which was itself a record for quality and number of exhibits.

Encouraged by the improved conditions now existing, many dog lovers who had temporarily relinquished their hobby have returned to the fancy, and outstanding specimens of some of the more popular breeds have been introduced from England, Scotland and Germany during the year.

A start has been made to publish in a popular weekly journal copies of the 30 odd registrations received by the Council each week. The scheme has proved most satisfactory, corrections and additional information relative to the pedigrees being received, and a sound foundation built for the Canine Stud Book, which it is proposed to publish at a later date.

### **The Chamber of Agriculture.**

The Twenty-seventh Annual Convention of the Chamber of Agriculture was held at Warragul on 19th, 20th, and 21st March, 1929. It was officially opened by His Excellency the Governor, Lord Somers, K.C.M.G., D.S.O., M.C., and attended by a large representative gathering of delegates from all parts of the State. The addresses that were delivered and the business items on the agenda paper were productive of valuable discussion.

THE LADIES' RETIRING-ROOM, WITH CRECHE ADJOINING.

At the conclusion of the Convention, the delegates were conveyed by special train to Yallourn, where they were conducted over the town and the works of the State Electricity Commission. The outing was of intense interest to all, while the magnitude of the electricity undertaking was a revelation to many.

Your Council accorded a hearty vote of thanks to the people of Warragul and those responsible for the Yallourn excursion for the courtesies extended to this Society's delegates during their visit to that portion of the State.

### **Horse Parade and Sale.**

The Annual Horse Parade and Sale conducted under the auspices of this Society was held at the Show Grounds on the 7th August, 1929. It was poorly supported by both breeders and buyers. Only 11 entries were received, as compared with 18 in 1928 and 42 in 1927.

It is becoming more apparent each year that the Annual Show provides a sufficient market for the disposal of heavy horses, and the advisability of continuing the parade and sale will shortly be receiving the consideration of your Council.

### **The Journal.**

"The Australian Farm and Home," with which is incorporated the Society's official journal, is still forwarded regularly every month to members of the Society. Besides giving an official report of the proceedings at the monthly meetings of Council, this publication contains much of interest to pure stock breeders, and, in addition, many articles of an educational character which should be of value to the rural producers of the community.

### **Membership.**

During the past year the membership of the Society decreased from 4892 to 4707. This falling off was, no doubt, attributable to the general depression that prevailed.

Your Council intends to make special endeavours to induce persons directly interested in agriculture, business houses and others to support the Society in its national work.

Invitations to again subscribe will also be issued to those members of the Society who have resigned in recent years, and, no doubt, these efforts will be the means of considerably augmenting the present roll.

### **General Activities.**

Your Council, acting in co-operation with a number of other bodies, assisted in providing agistment for a large number of horses brought from the drought-stricken portions of the Mallee.

Through the courtesy of the Society for the Protection of Animals, an interesting competition is being introduced, for the purposes of uplifting the standard of treatment of live stock in rural districts and to demonstrate the compatibility of humane methods of live stock management with profitable farming practices. A sum of £250 in prize money is being offered in these competitions, which are confined to a large district in the extreme north-west of the State.

In order to encourage the testing of grade herds, your Council has decided to present suitable certificates to each grade herd owner, who, under Association test, has developed a herd that produced a specified

THE NEW SHEEP PAVILION.

quantity of butter fat per head. It is felt that action of this character will encourage the development of grade herds and assist in raising the average production per cow throughout the State.

Consideration has been given to the desirability of conducting Night Shows in connection with this Society's annual exhibitions, but the opinion is held that the weather conditions in September are too precarious to warrant the heavy expenditure that would be incurred in illuminating the grounds and providing the necessary arena programmes. An expression of opinion was obtained from standholders, and it was ascertained that the majority was unfavourable to the opening of the Show at night while conducted during the spring period of the year.

### **The President.**

In recognition of public service of a very high standard, His Majesty the King, in June last, graciously created Colonel Charles Edward Merrett, V.D., a Commander of the Order of the British Empire.

Even though this honour was not conferred on account of Colonel Merrett's long association with this Society as its President, your Council regarded it a compliment to the Society, in addition to being a well-deserved reward to the recipient.

### **Council.**

As nominations for election at the annual meeting were not in excess of the vacancies on the Council, the whole of the retiring members were re-elected.

It is recorded with extreme regret that, on 22nd October, 1929, Mr. Andrew D. Rowan passed away after a long illness. Your Council placed on record its appreciation of the excellent service rendered to the Society by Mr. Rowan and an expression of profound regret at his death. A resolution of sympathy was conveyed to the bereaved widow and daughter.

The vacancy that was thus caused was filled at the December meeting by the election of Mr. Arthur V. Hiskens, of Moonee Ponds.

Leave of absence was granted to Messrs. S. McKay and A. C. Gibb, who both paid a visit to Great Britain during the year.

### **The Staff.**

Pursuant to the Council's expressed desires, the Secretary made an extensive tour during the year. He visited America and Northern Africa and toured the continent of Europe, as well as Great Britain and Ireland. While away he visited a number of shows and exhibitions, about which he submitted a comprehensive report shortly after his return. The experiences thus gained by your chief executive officer, and the evident benefit to his health, should be of value to the Society in the years to come.

At the December meeting your Council approved of a superannuation scheme, whereby the members of the permanent staff will contribute two and a half per cent. of their respective salaries and the Society will contribute a similar amount, with the addition of one-quarter of one per cent. for every year over ten that each individual member has been in the Society's service. This proposal will involve the Society in an annual expenditure of approximately £200, but, before bringing the scheme into operation, it will be submitted for the approval of members at the Annual Meeting.

At the December meeting your Council approved of a scheme of re-organisation of the staff, whereby it is believed that benefits will devolve upon the Society if its chief executive officer is enabled to give more attention to outside organising work, such as securing a more educational class of exhibit stands, a more representative display of primary products, and more attractive forms of entertainment for the arena patrons.

To enable this to be done, your Council appointed Mr. Henry Schwieger Manager, Mr. Louis Monod Secretary, and Mr. Thomas Glynn Assistant Secretary; and the necessary amendments to the By-Laws to more clearly define the duties of the respective officers have received attention.

### Acknowledgments.

Your Council desires to thank His Excellency the Governor-General, Lord Stonehaven, for the kindly interest he has at all times shown in the Society's activities.

To His Excellency the Lieutenant-Governor, Sir William Irvine, K.C.M.G., the Society is indebted for officially opening the Show and for presenting trophies to the successful competitors.

To the State Government your Council expresses its keenest appreciation, not only for maintaining the Society's subsidy, but for providing such a magnificent display of agricultural and other products in the Government Pavilion at the Show Grounds, and for awarding a number of special prizes for competition during the Show.

To the Judges and Stewards the Society's best thanks are due for carrying out their onerous duties in such a highly satisfactory manner.

For the liberal support accorded by donors to the prize fund the Council desires to express its warmest appreciation.

To the exhibitors and the standholders the Society's warmest thanks are due for their hearty co-operation in staging the Show and for their ready compliance with the whole of the regulations.

It is also desired to thank the press for having kept the operations of the Society so prominently before the public, and to all others who in any way assisted in furthering the interests of the Society, your Council accords its warmest thanks.

### Finance.

On reference to the financial statement, it will be seen that the revenue for the year was £44,503/18/8, which shows a decrease of £7850/5/11 on that of last year.

The expenditure (including £8733/18/2 in prizes, and £13,555/6/8 for buildings and improvements) amounted to £54,670/2/9, the bank overdraft being increased from £31,170/3/8 to £41,336/7/9, and the Society's indebtedness to the Government, inclusive of interest, decreased during the year from £45,370/9/7 to £44,147/3/10.

Taking the expenditure in permanent improvements as assets, the working expenses show a profit on the year's transactions of £3389/2/7, against last year's profit of £11,145/6/7.

It is worthy of mention that approximately 40 per cent. of the amount paid in salaries to the permanent staff is now being provided by the Associations whose secretarial work is conducted by the Society.
