# Important Information for Beef Cattle Exhibitors

## Pesti Virus

Exhibitors must provide a signed veterinary certificate or laboratory report, listing animals and their identification upon entry.

## Breed Representatives

Each Breed Society or association may nominate persons qualified to act as a breed representative for their breed. Melbourne Royal must approve and officially appoint the breed representative.

A Breed Representative's essential duties are to provide a link between Exhibitors and the Cattle Superintendent, and to inform Exhibitors at the direction of Melbourne Royal.

## Sand in the Livestock Pavilion

Please note that sand will be placed on the pavilion floor to address cattle slipping. Please refrain from sweeping and removing the sand from the pavilion floor.

## Calf Spaces

Due to space restrictions, spaces cannot be booked for calves at foot. Calf spaces will only be provided where space permits.

## Sawdust Bedding For Cattle – Principles For Good Management

To achieve the best results from bedding cattle on sawdust, the following system of management is recommended:

- a) Pick up manure at every opportunity.
- b) Avoid water spillage in stalls.
- c) Regularly smooth out the bed with the aim of assisting drying.
- d) Consider using rubber matting for front half of bed.
- e) Do not dig out the wet patches.
- f) Do not disturb the bedding base.
- g) Keep the top of the bed loose.

Experience has shown that properly managed bedding will last a full Show with little need for top up bedding, particularly with some classes of livestock.

## Tattoos and Inspections

The 2023 Show will see the strict enforcement of Special Regulation 26. If no tattoo is present at the point of inspection the exhibit will be disqualified from taking any further part in the competition.

## Clipping of Exhibits

A limited number of clipping frame spaces will be available, provided an application for space and a \$150.00 fee (GST inc.) accompanies entries.

All clipping frames must have secure flooring. Clipping frames must only be kept in their designated area. Failure to adhere to this rule will result in automatic removal of the clipping frame.

Clipping frame tags (distributed with exhibitor packs upon arrival) must be fixed to clipping frames for the duration of the Show. Any clipping frame not displaying a tag will be required to be removed.

CELEBRATING  
175 YEARS  
1848 - 2023

# 2023 Melbourne Royal Beef Cattle Competition

Melbourne Royal are thrilled to welcome the Limousin Feature Breed Show. The Australian Limousin Breeders' Society is celebrating the 50th anniversary of Limousin in Australia and New Zealand and we look forward to a spectacular and memorable event.

Championship prize money of \$50 will be made available by Melbourne Royal for Junior and Senior Champions, \$200 for Grand Champion Female and \$300 for Grand Champion Bull, provided there are three or more individual exhibitors competing in the ring for this breed. All prizes and prizemoney are subject to change.

The Limousin is a very old breed, as indicated by cave paintings dating back thousands of years. They originated in the mountainous Massif Central area of France where the weather can be severe, and evolved into hardy, feed efficient animals used for agricultural labour and prized for their meat.

There were a lot of qualities that attracted early adopters of the breed. Calving ease and calf vigour were very good and relative to growth, the Limousin breed remains a calving ease leader. Additionally, females were known to have excellent stayability and lifetime maternal productivity.

A hallmark of the breed is a genetic mutation in the F94L myostatin gene. This causes the growth of additional muscle fibres, as evidenced by the shape of Limousin cattle, particularly around the hindquarters. In Limousins this "double muscling" is pronounced but not extreme. It results in additional meat and therefore profit without negative effects. All the muscle fibres are fine and so Limousin beef is tender.

A further feature of the breed is its lighter bone structure and increased meat yield. Limousin carcasses usually return 57-63% meat yield and up to 80% of saleable meat. Due to the combination of additional yield, tenderness and no excessive fat, Limousins win many carcass competitions and processors like a Limo infused carcass. The superior carcass attributes of the Limousin is why Limo sires are used in so many crossbreeding programs.

The modern Australian Limousin is now a very commercially relevant animal. Much more softness has been bred into the cattle to aid meat quality, and they have more milk. Significantly, the breed has been a leader in two traits: converting from a horned to a polled breed, and improving docility. The breed is now over 90% polled. Limousins were the first breed to develop an EBV for docility and the breed is now extremely docile.

These advances improve worker safety and animal welfare.

*It is now being increasingly recognised that the breed has above average feed conversion rates and excitingly, early research points to the breed having a lower methane output than others.*

*Limousin breeders around Australia, who have made such significant gains over the past 50 years, look forward to providing Limousin seedstock that is commercially relevant, efficient and socially responsible to the beef industry into the future.*
